

# TUTORIAL 1 : SETTING UP THE REPOSITORY

---

This tutorial will take you through setting up the design repository for your project work. Design repository (or repo) is a part of any software or hardware design company which keeps the records of different versions of your design. These versions can be accessed later when needed.

## 1 CONTENTS

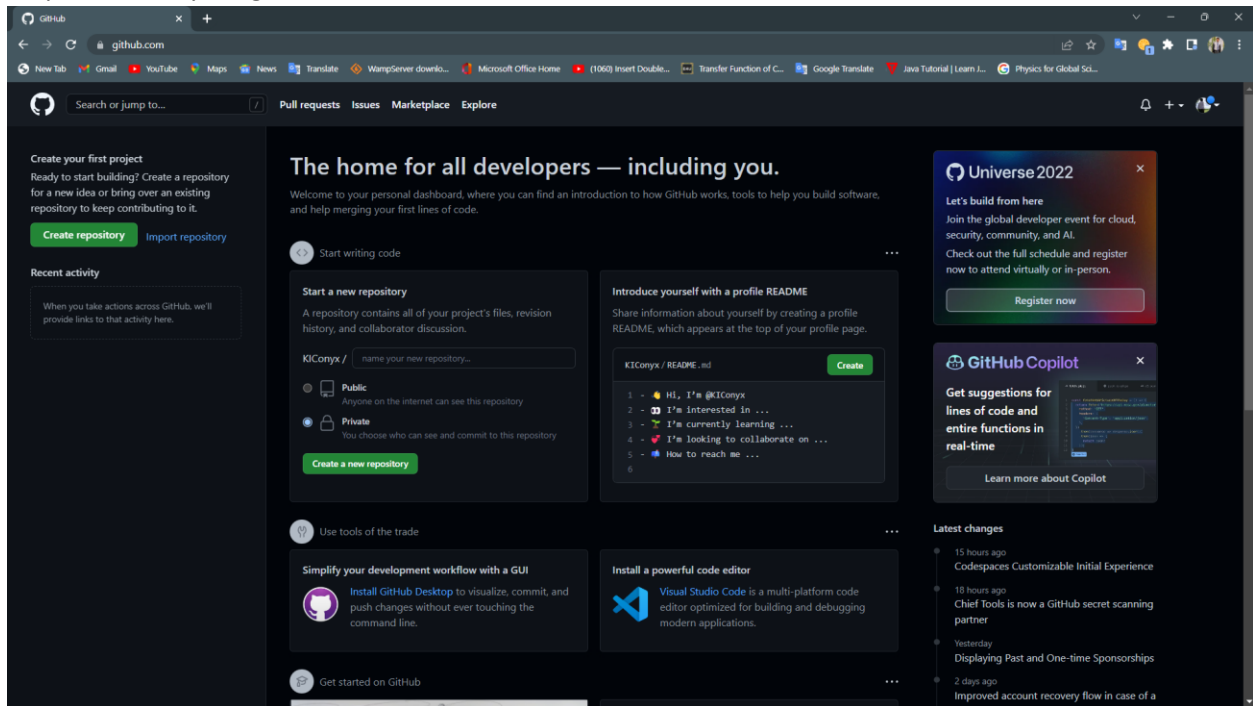

---

TUTORIAL 1 : SETTING UP THE REPOSITORY.....	1
1.1 familiarizing with Github.....	1
1.2 Github GUI .....	5
1.3 Collaboration.....	8
1.4 Tasks.....	13

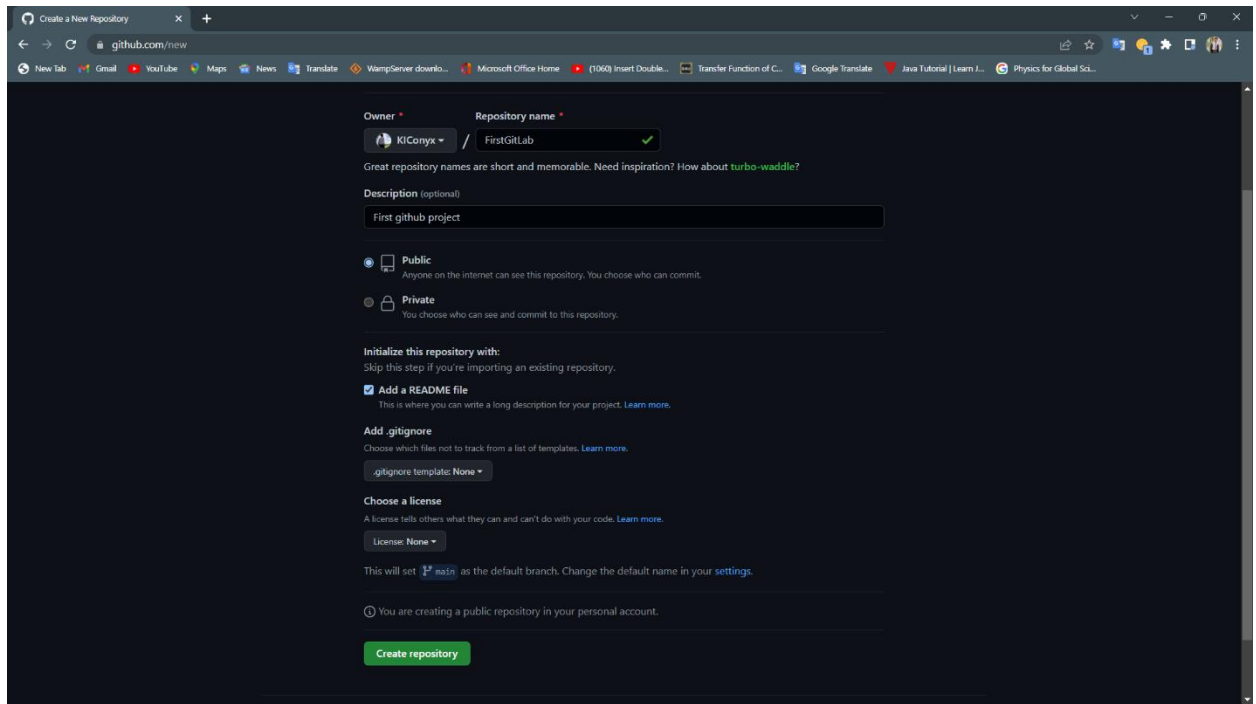

### 1.1 FAMILIARIZING WITH GITHUB

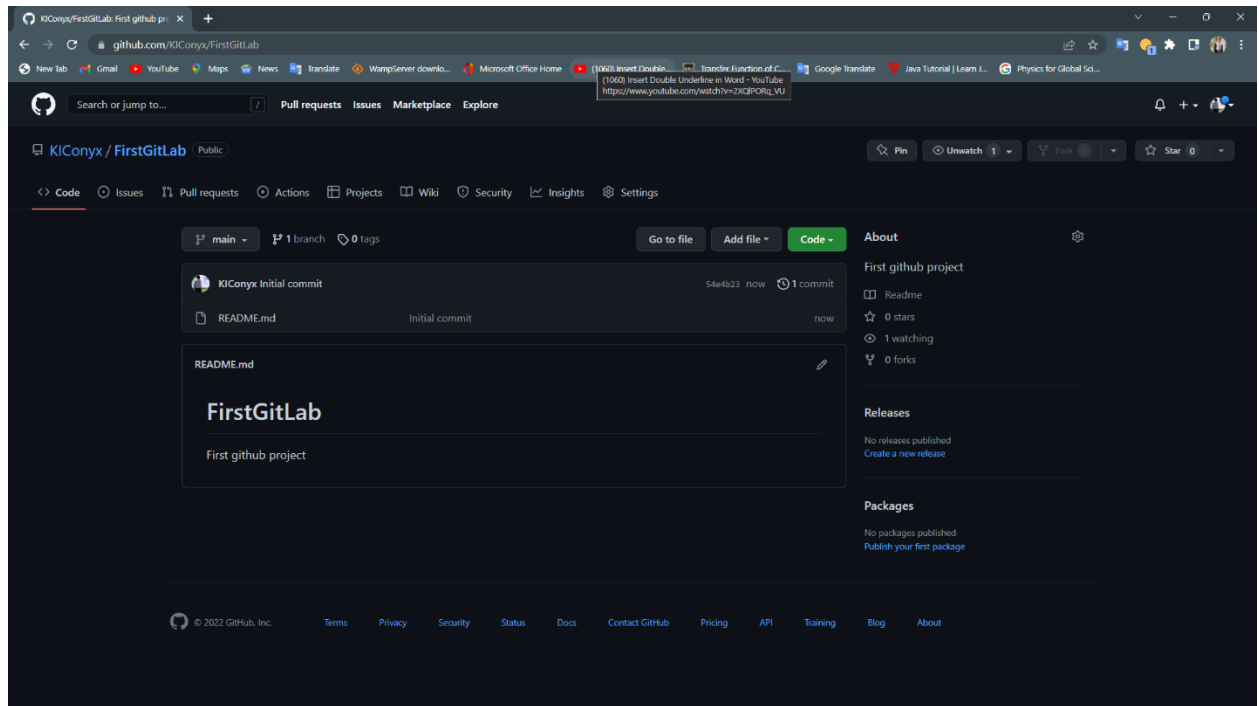

Github.com is an online hosting platform which can be used free of charge (maximum three users for the basic version). It lets you and your team work collaboratively from any where in the world. This part of the tutorial is based on <https://guides.github.com/activities/hello-world/> . Please go though the complete tutorial, if needed better explanations in some parts and for step by step guidelines.

- Step 1 : Create your github account

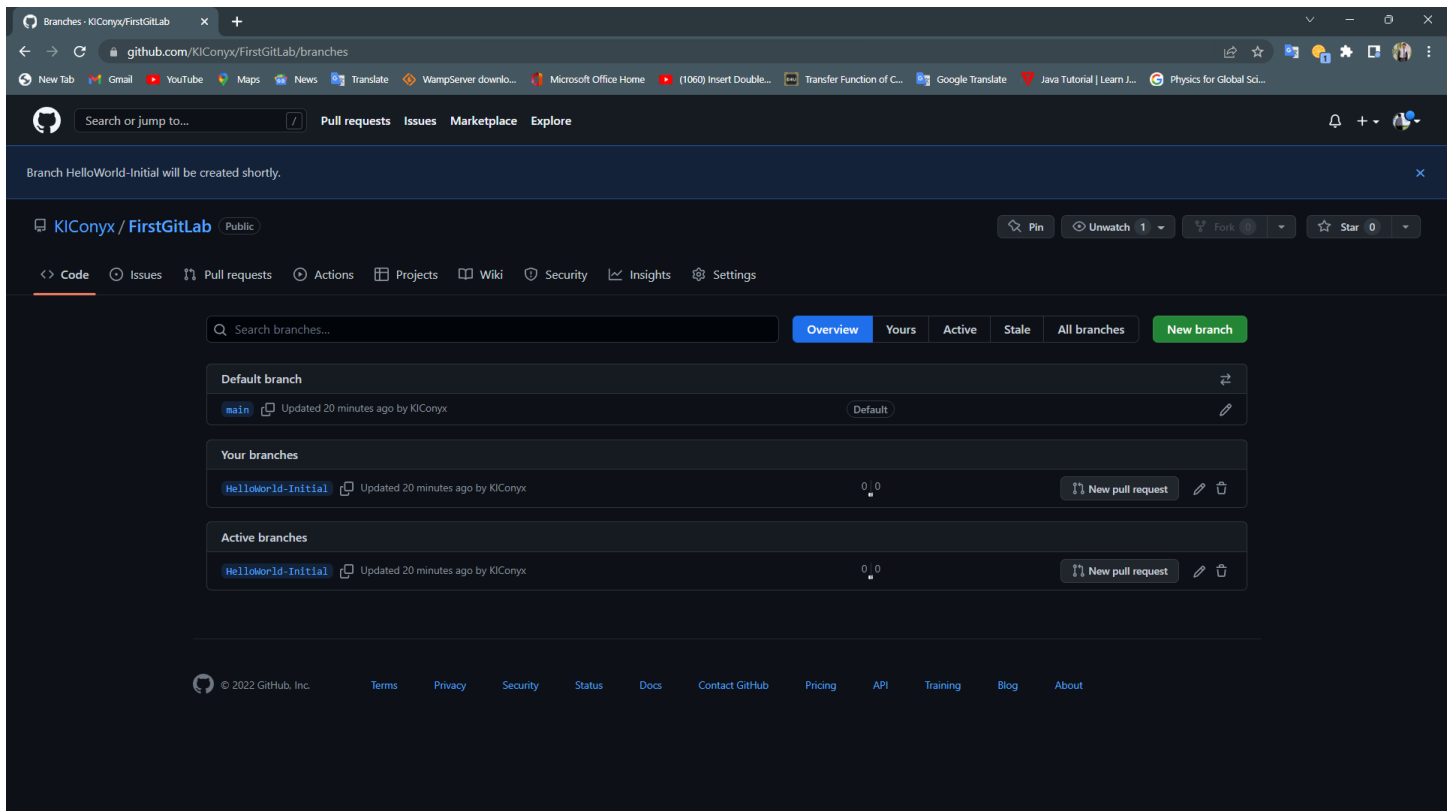

- Step 2 : Create a repository

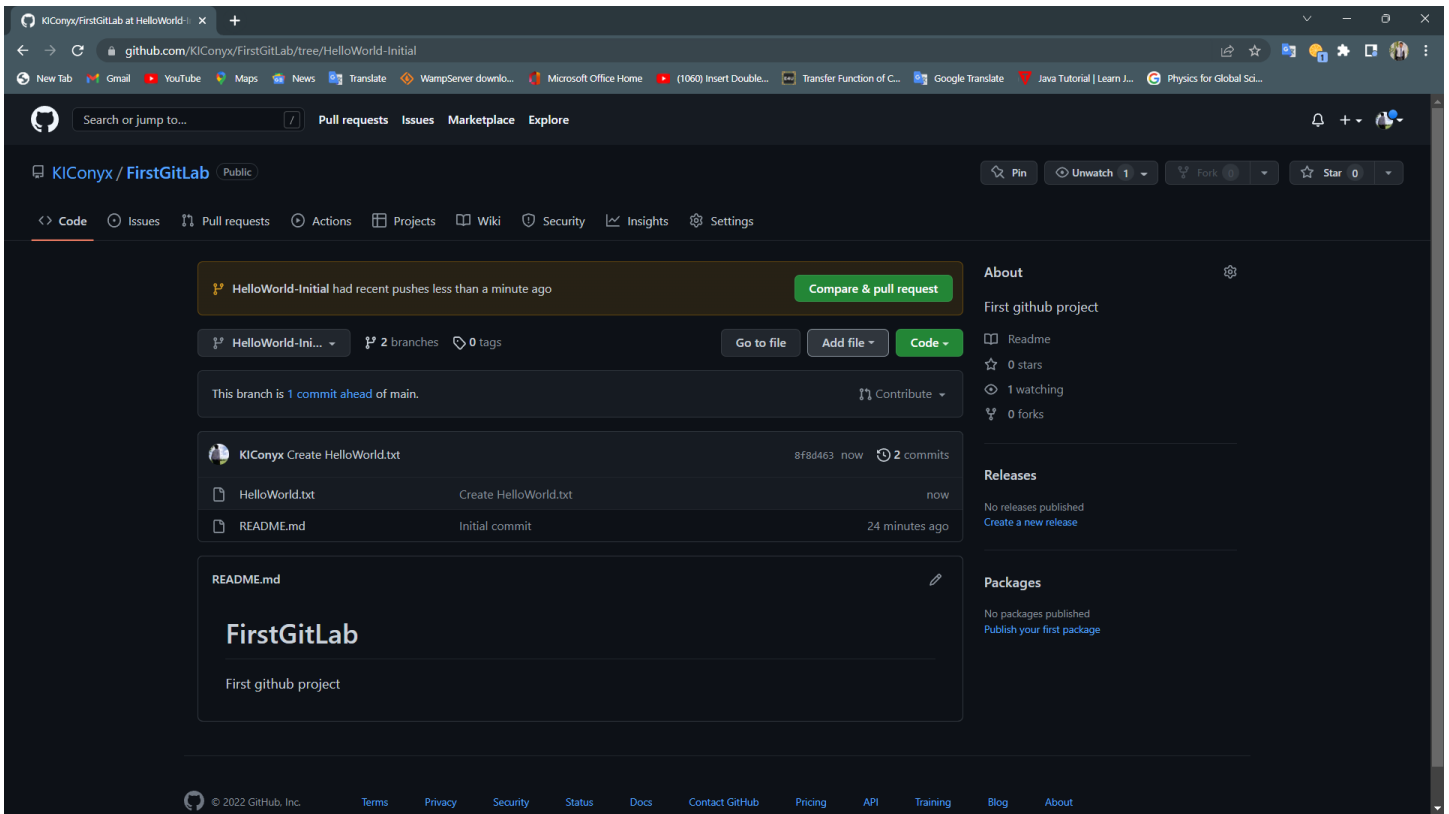

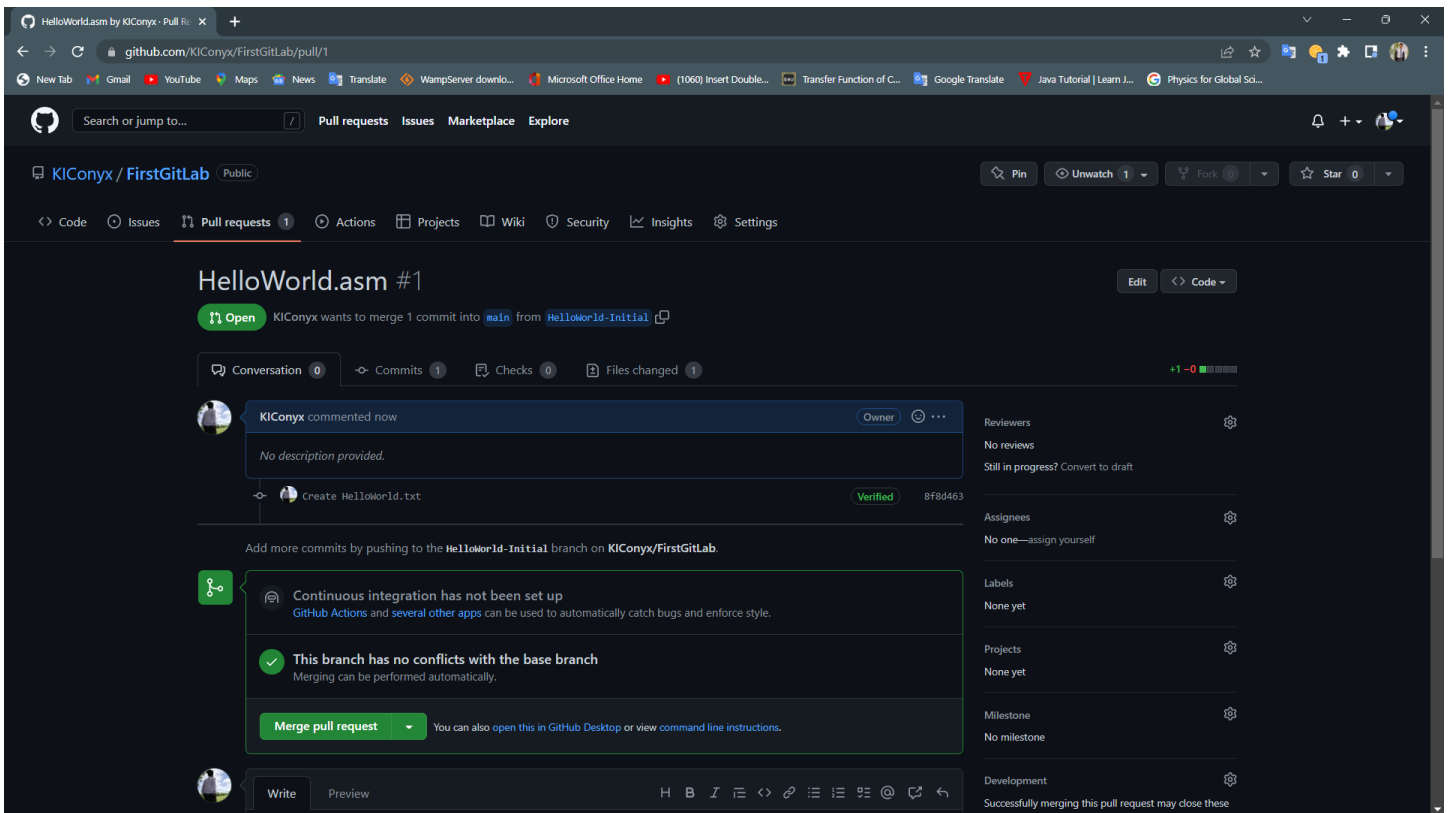

- Step 3: Branching

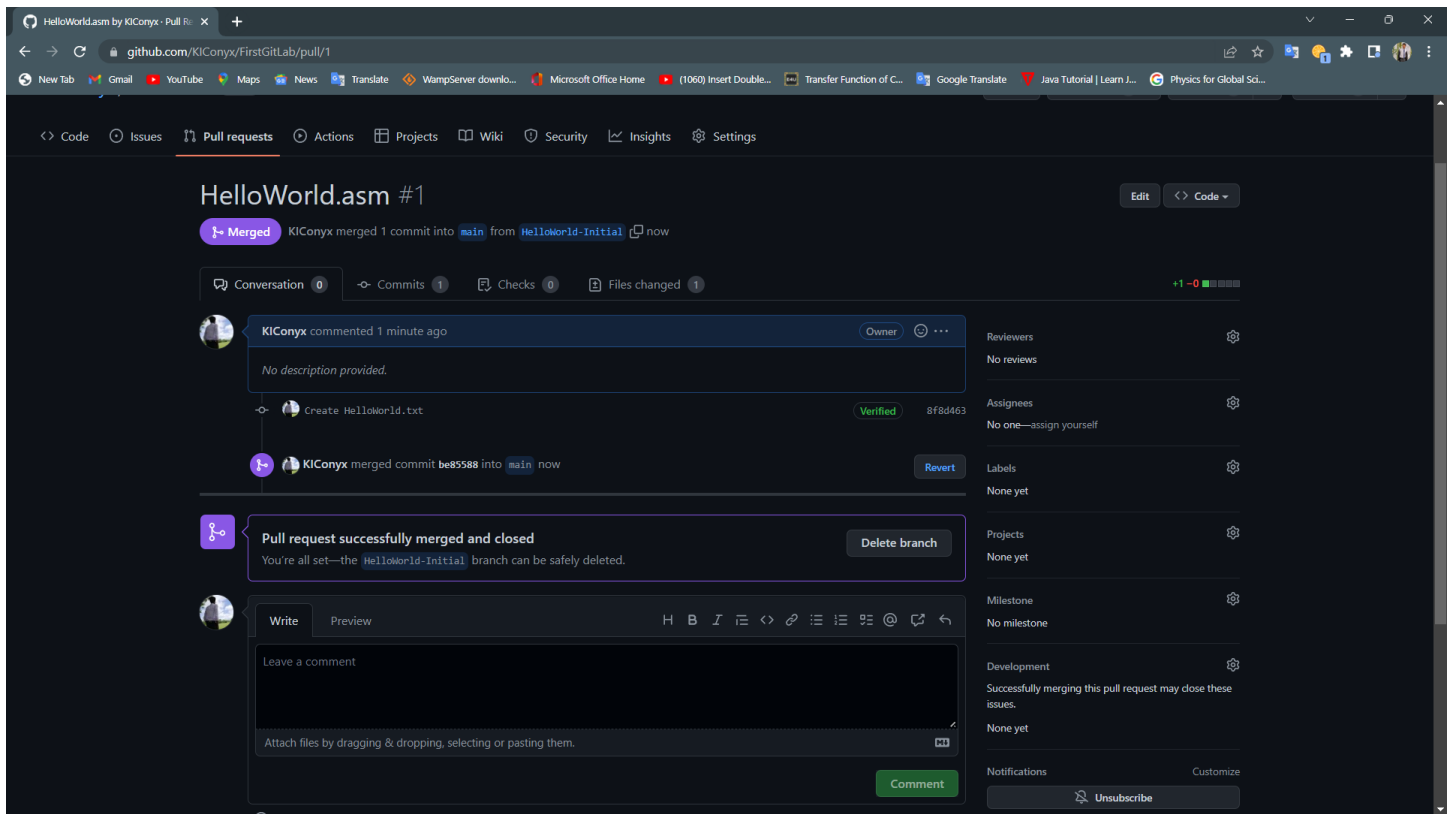

- Step 4: Commit changes

- Step 5: Open a pull request

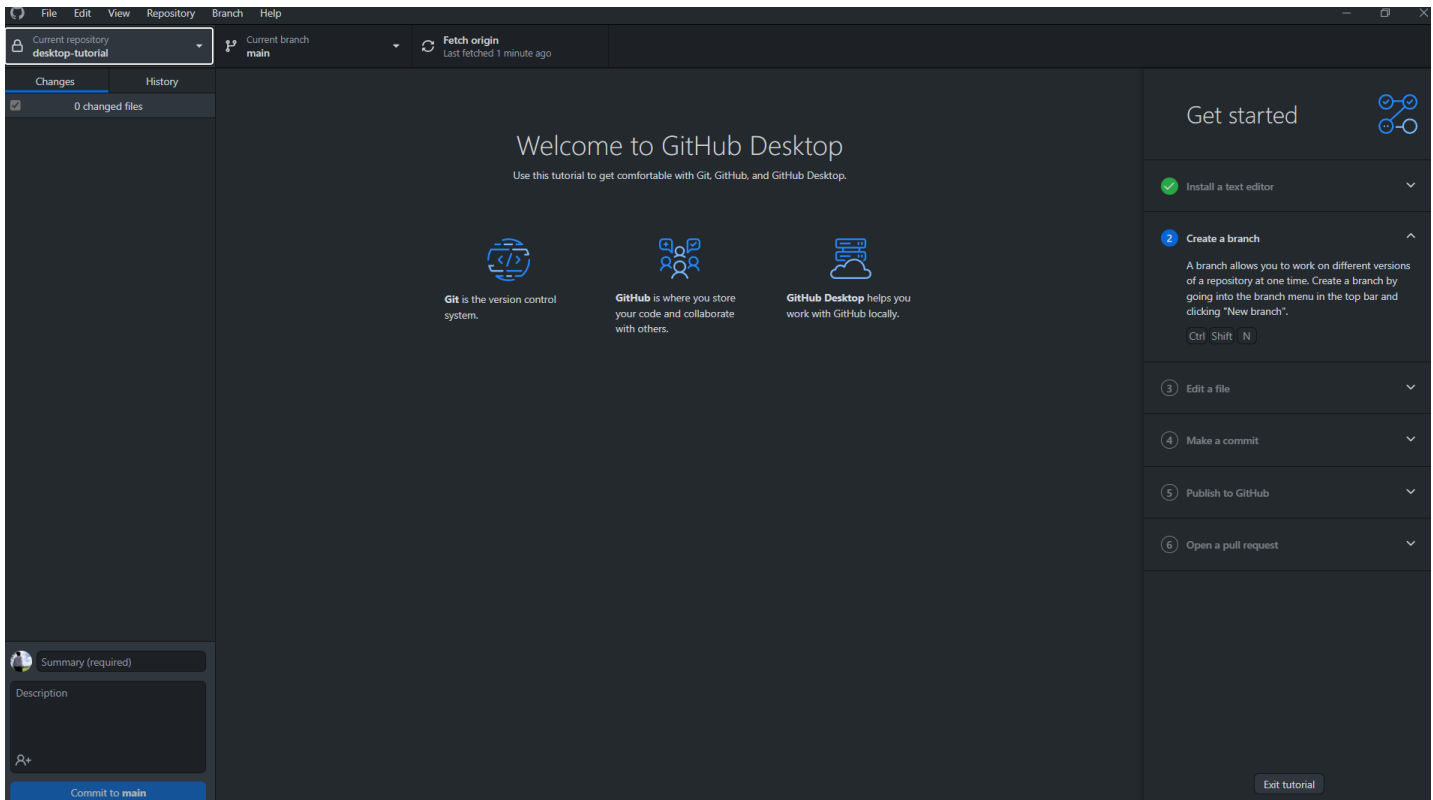

- Step 6: Merge the pull request

## 1.2 GITHUB GUI

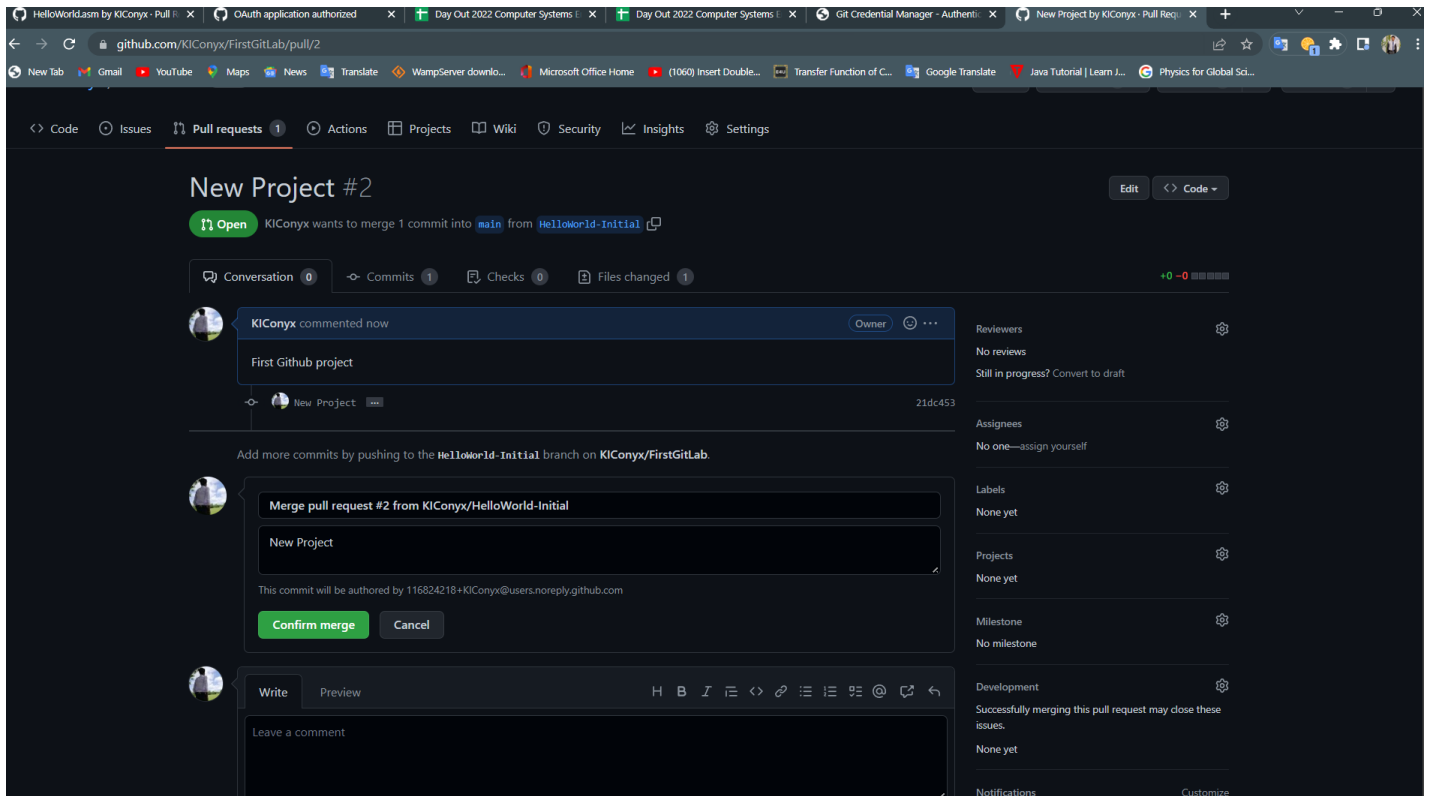

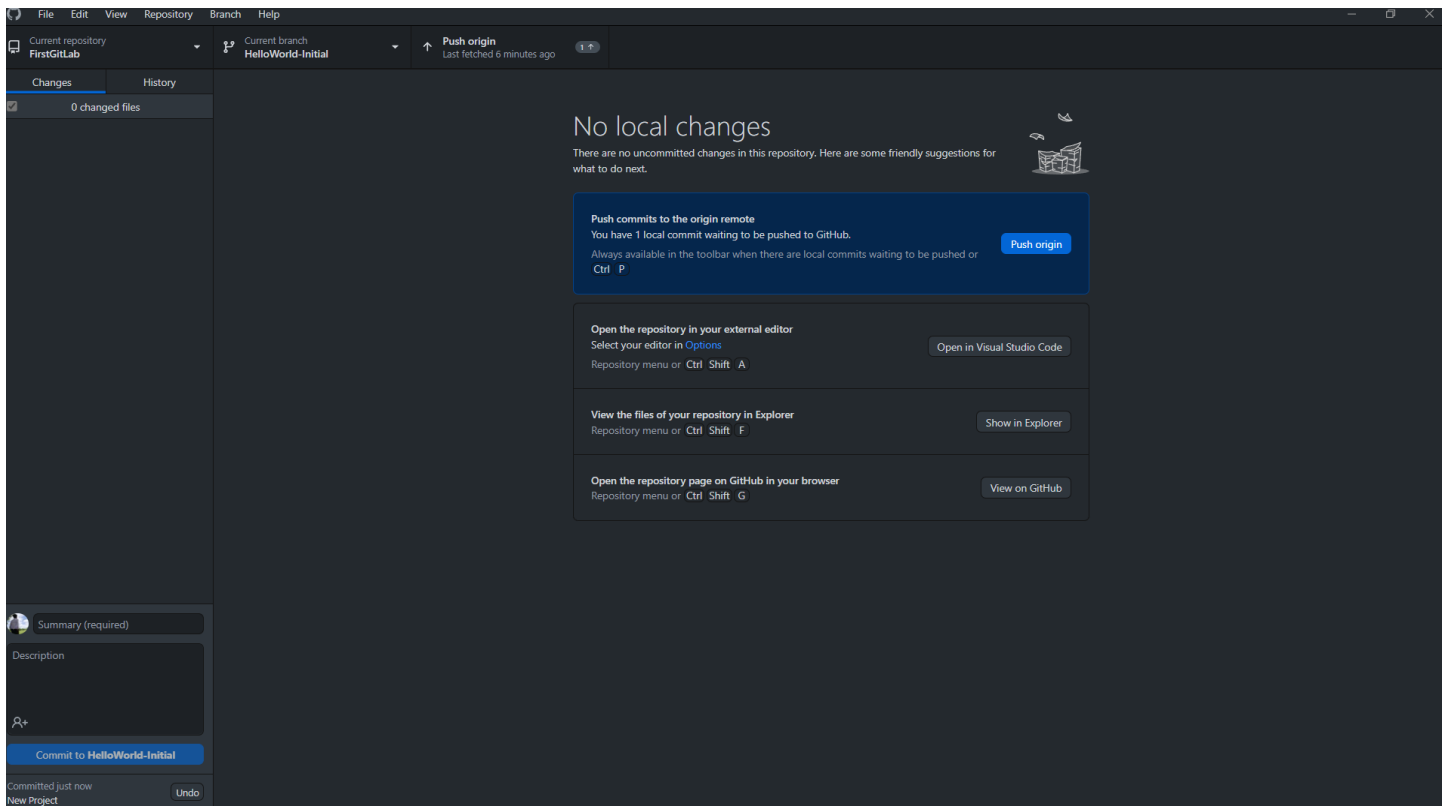

You can manage your codes locally with the help of command line arguments or with the Github GUI. Following instructions are to setup the Github GUI in your computer.

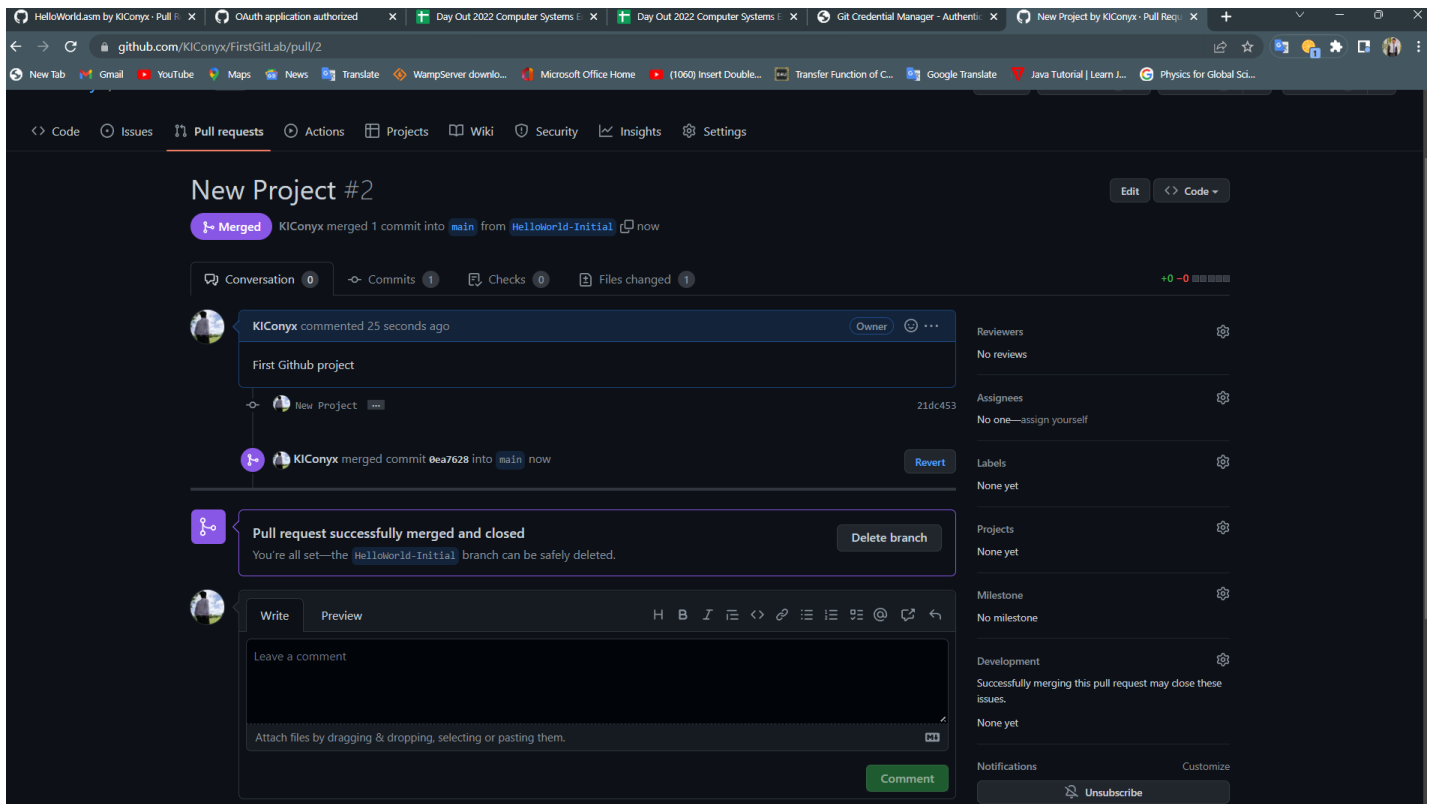

- Step 1 : Installing Github desktop

- Step 2 : Managing the repository

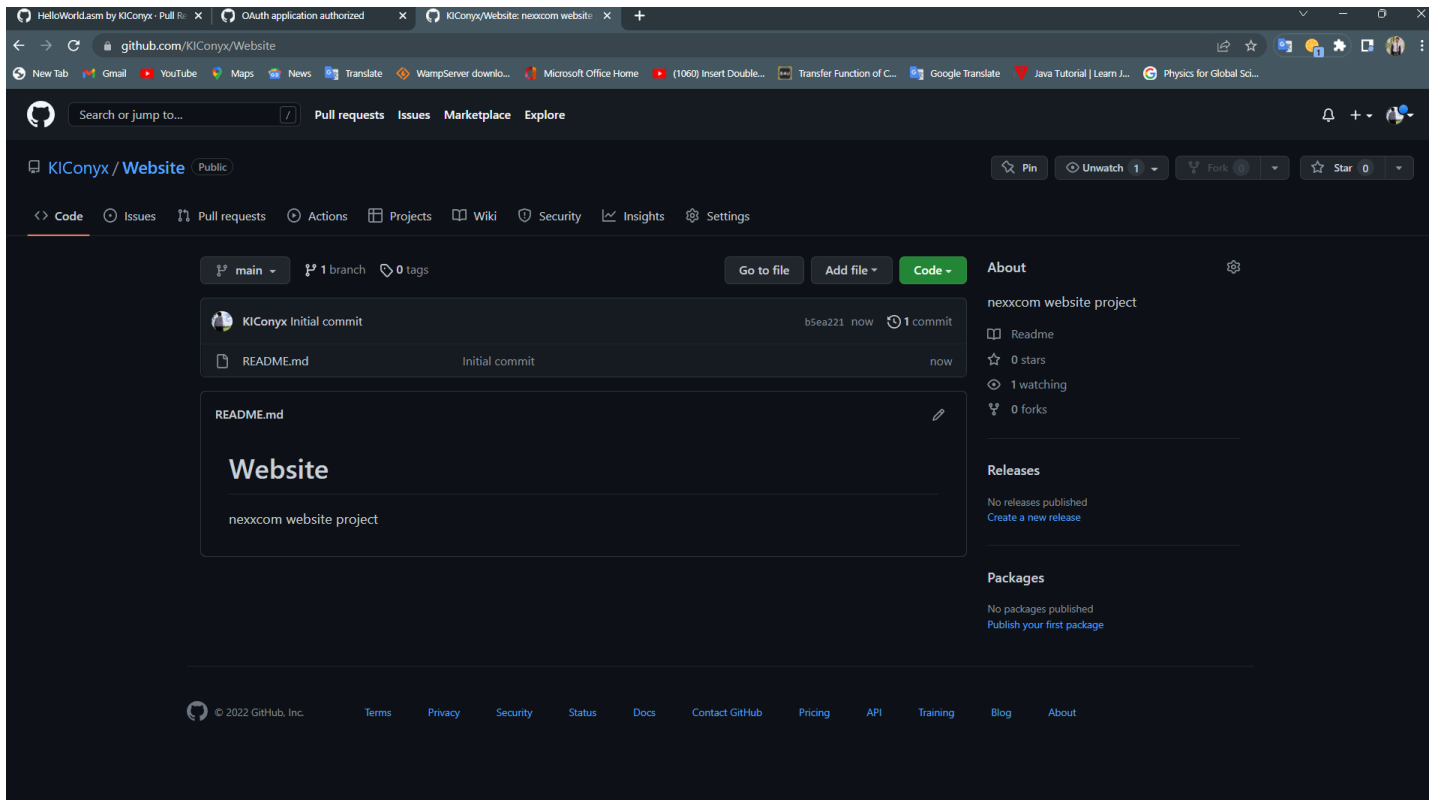

### 1.3 COLLABORATION

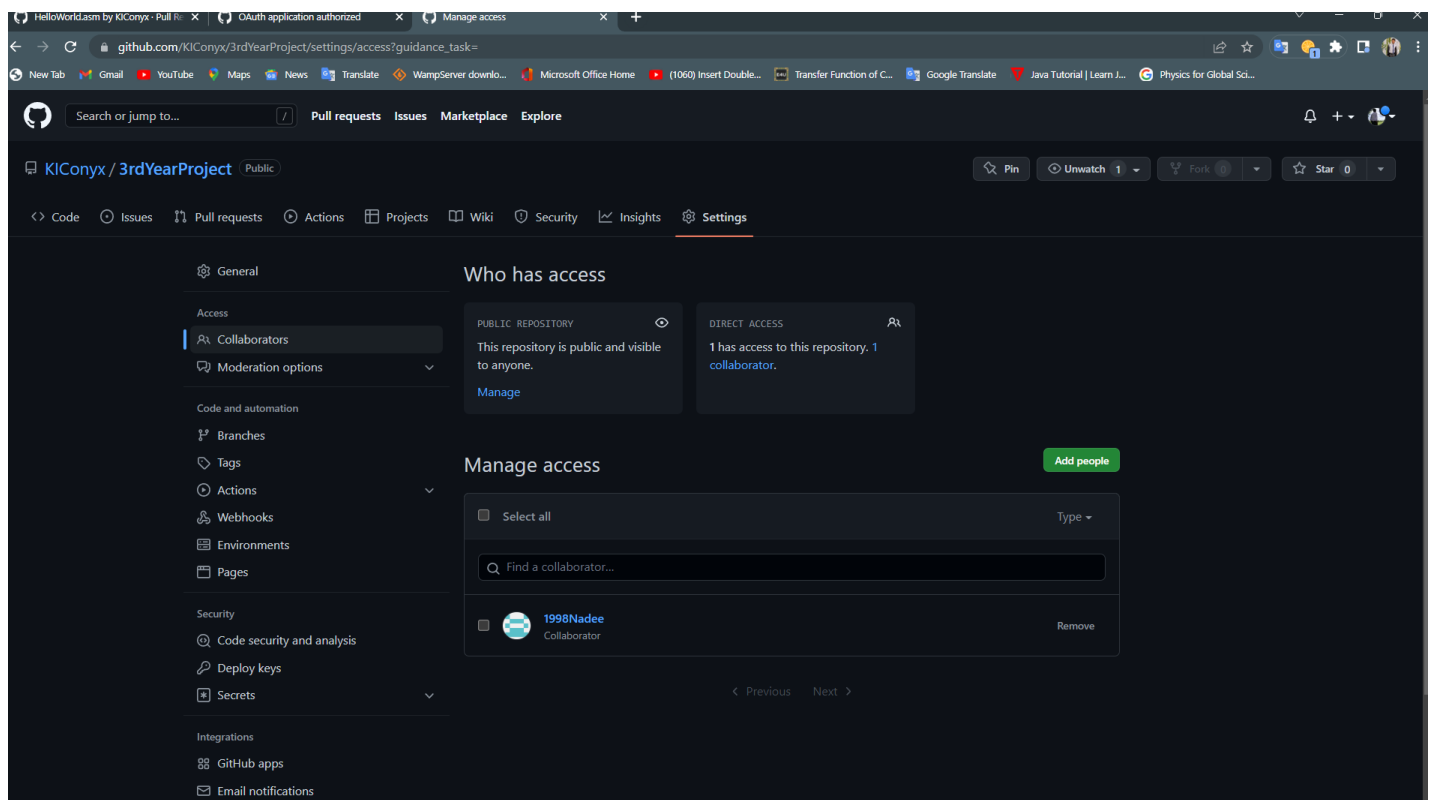

Main advantage of Git repo is the possibility of working simultaneously on different parts of a project. Follow the steps to create your own repo to be shared between team members.

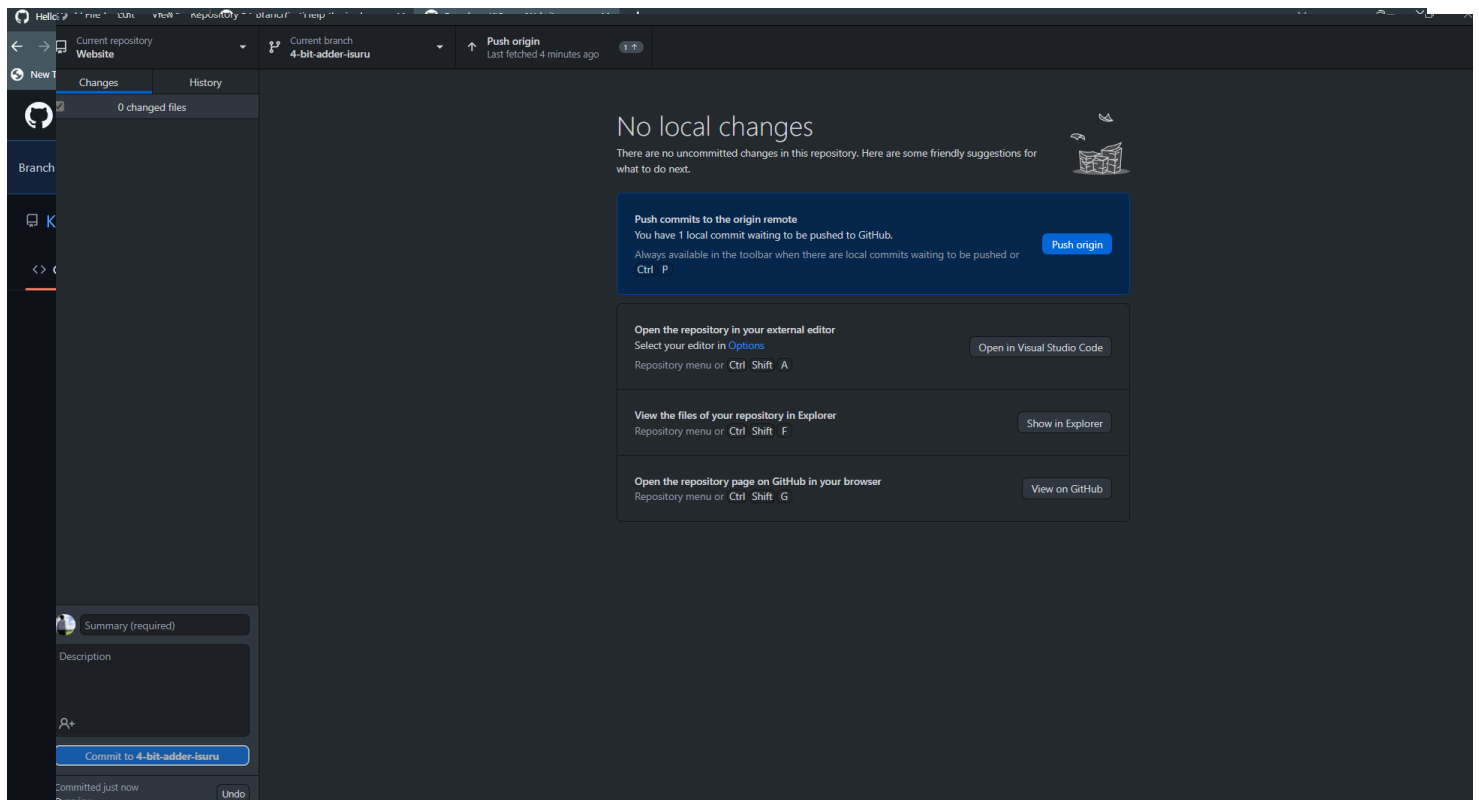

- Step 1: Creation of new repository

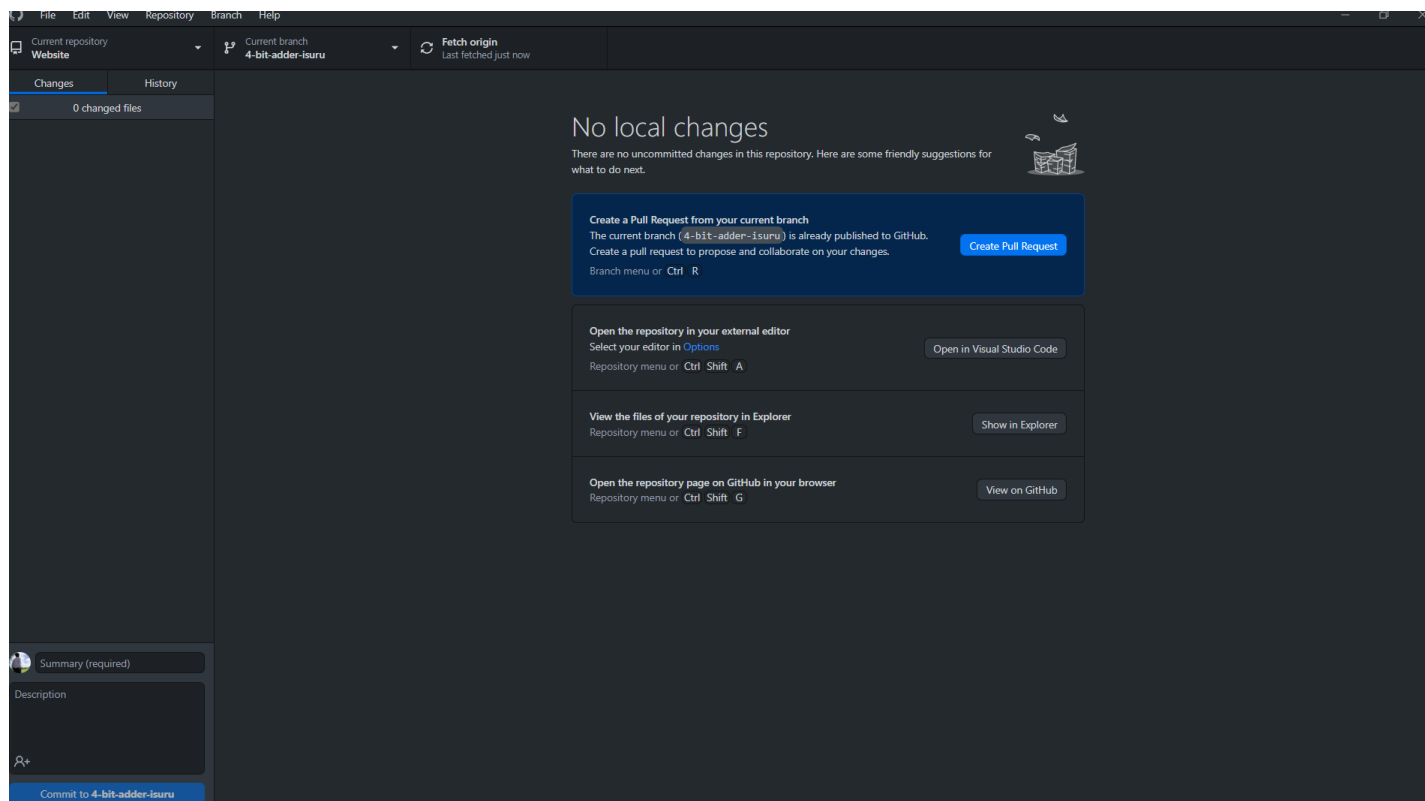

- Step 2: Collaboration

- Step 3: Project setup

- Step 4:

## 1.4 TASKS

1. Add “ishara0925” as a collaborator to your CLEAN project repository. This repository is the one you are going to use for your project.
2. Add screen shots of the repository folder structure to your project presentation. Project presentation should be present inside the presentation folder in your project folder.
3. Add a short description of your project under the repository description.

ChangesHistory

0 changed files

No local changes

There are no uncommitted changes in this repository. Here are some friendly suggestions for what to do next.

Open the repository in your external editor

Select your editor in [Options](#)

Repository menu or `Ctrl + Shift + A`

Open in Visual Studio Code

View the files of your repository in Explorer

Repository menu or `Ctrl + Shift + F`

Show in Explorer

Open the repository page on GitHub in your browser

Repository menu or `Ctrl + Shift + G`

View on GitHub
